# CSE 29 Week 5 Discussion

Project 3, structs, ...

# PA3 - The Sea(C) Shell: Due Friday, 11/06 at 10:00pm - Classroom50 Link

## Learning Goals

This assignment calls upon many of the concepts that you have practiced in previous PAs. Specifically, we will practice the following concepts in C:

- string manipulation,
- command line arguments,
- process management using fork(), exec(), wait(), and waitpid(), and of course,
- using the terminal and vim.

We'll also get practice with a new set of functions for opening, reading from, and writing to files.

# Structs

- Shallow vs Deep Copy in structs
- String Literals
- Memory layout of struct types
- Pointer Decay

# Questions

- **Project 3**
- Lecture content: pointers, stack, memory allocation, structs, ...
- Labs: unix commands, git, vim, ...
- etc

# Reminders

- Project 2 resubmission due **10PM** this Friday, 11/6
- Project 3 due **10PM** Friday, 11/6
- Lab 5 check-off due **11AM** Monday, 11/2
